

ARTELINEA

FIRENZE 1962

Thank you for purchasing a washbasin in **OPALITE**, Artelinea's trademark, an innovative and exclusive material.

With this material you have contributed to protect the environment. Opalite is a vitreous material resulting from the controlled fusion of a unique formulation of silicons and other noble minerals and being glass is completely recyclable. Our Opalite wash-basins are made by skilled glassworkers and are the result of a long production process of thermal, cutting and grinding treatments. This process makes this unit an esthetically beautiful and durable over time.

As a consequence of this industrial fusion process any slight imperfections are inevitable but shall be considered as a feature of this valuable material.

Our testing controls are performed by skilled operators that with the aid of adequate tools and in compliance with the standards for painting and coating shall guarantee the quality and the durability of our basintops. Keeping the standard distance from the typical field of the product used, everything that is not visible from this distance shall be considered within the normal manufacturing tolerances.

This product is certified exclusively for the use for which it was designed and is guaranteed worldwide by the following rules **UNI EN 14688:2007-TEST REPORT NO. 021715-01** and by our long experience in the bathroom market since 1962.

Artelinea S.p.A.
