NEW glass DECOR

Rivestimento formato dall'accoppiamento di stratifica tra cristallo trasparente sp.5mm, decoro e ceramica sp.5mm, per uno spessore totale di circa 11mm. Glass nasce grazie alla tecnologia di incollaggio sottovuoto e in temperatura con uno speciale sigillante posto tra la lastra di ceramica e quella di cristallo creando un unico elemento resistente all'umidità e agli agenti chimici, dalle finiture superficiali personalizzabili. Il rivestimento è disponibile in 5 decori:

Il rivestimento è disponibile in 5 decori:

- CHERRY
- CALYPSO
- GARDEN
- R_EVOLUTION
- MESH

Ciascuno dei 5 decori è disponibile in piastrelle 100x100 cm.

Covering formed by the stratified match of a layer of 5mm transparent glass, a layer of decoration, and a layer of 5mm ceramic for a total thickness of around 11mm. Glass can be produced thanks to a technology that, with a process of high-temperature vacuum-sealing with a special sealant put between the ceramic and the glass sheets, creates a single element. This new element is resistant to moisture and chemical agents and has customized finishes. This covering is available in the following 5 decorations:

- CHERRY
- CALYPSO
- GARDEN
- R_EVOLUTION
- MESH

Each one of the five decorations is available in 100x100 cm tiles.

Revestimiento formado por el acoplamiento de estratificación entre cristal transparente grosor 5 mm, papel decorado y cerámica grosor 5 mm, con un grosor total de aproximadamente 11mm. Glass nace gracias a la tecnología de encolaje en vacío y temperatura con una cola especial sellante colocada entre la lastra de cerámica y la de cristal creando un único elemento resistente a la humedad y a los agentes químicos, consiguiendo un acabado superficial personalizable. El revestimiento está disponible en 3 decorados:

- CHERRY
- CALYPSO
- GARDEN
- R_EVOLUTION
- MESH

Cada uno de los 3 decorados está disponible en baldosas 100 x 100 cm.
